Making a Lesson

Things to consider:

- You need at least 4 pictures to make a lesson.
- You don't want ambiguous right answers. Don't have *father* and *uncle* in the same lesson – students wouldn't know which adult male to click.
- There are certain rules about how you can name files – you cannot use "!,?':" in filenames.

  If you want to use any of those with your pictures, you have to "translate" the name into something that won't confuse the computer.
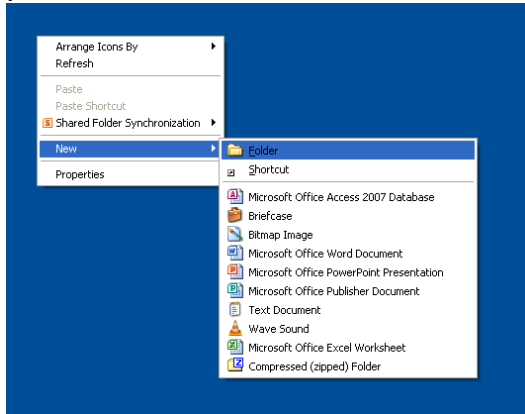

| If you want to display this:	Use this in the file name:
!	`. exclamationmark`
'	`.apostrophe`
?	`.questionmark`
,	`.comma`
:	`.colon`

Example:

Filename: What.apostrophes your name.questionmark My name is Tim..JPG

Display: What's your name? My name is Tim.
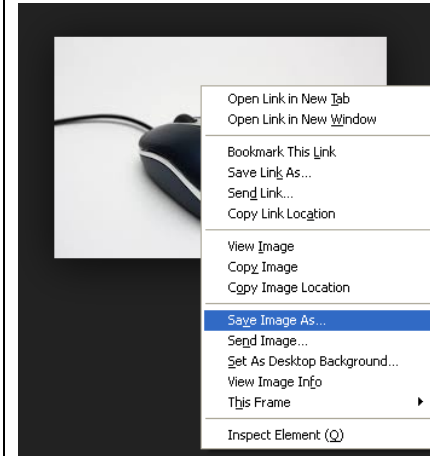

| Step 1: Make a folder to hold your pictures.	Step 2: Name the folder.	Step 3: Find and save your pictures to the folder you just made. Use Wikipedia.org or images.google.com
Step 4: Name your picture: Repeat Steps 3 and 4 until you have all the pictures you want saved to the new folder.	Step 5: Compress (or Zip) your folder.	Step 6: Send your folder to Tim – tim.leverentz@isd623.org Tim will add this lesson to the program.
